APPRENTICESHIP: FOR STUDENTS AGE 16+

FCA's Apprenticeship Program will jumpstart your student's career and give them the opportunity to have a two-year head start in the workplace.

The Apprenticeship Program is designed to produce a confident and responsible adult, with the self-awareness, life and job skills, work experience, and diploma needed to jumpstart a career and begin a successful, independent life. The best part for the student is they get to work in the field of their choosing.

The Apprenticeship Program is also a good option for those who are unable to continue in traditional high school, yet still need a high school diploma. For students that do not plan to attend college, obtaining valuable workforce skills is more important than college-prep classes.

Apprenticeship is a traditional and time-honored approach to job training. The goal is to allow a student to enter the world of work and learn specific skills, offered by the job, that enhance the student's classroom experience. For many people, textbook and traditional learning do not occur until real life situations and examples open a door for a student to explore new levels of learning. For example, some students do not understand the importance of writing skills until their boss asks them to write a letter. When a stu-

dent realizes they do not have the necessary skills to advance, a reason has now been presented for the student to learn a skill, the mind becomes fertile soil where seeds of learning can grow.

Many adults today will admit that their first job experiences were much more valuable to them than the advanced high school courses they were required to take. This is because traditional high school curricula does not devote time to teaching a student practical skills that are necessary to becoming a successful worker.

The student's employment is supplemented with practical academics that allow the student to graduate in one or two years.

Placement in the program begins with extensive aptitude testing. Job evaluations give parents and students important feedback on the student's progress. Classes are held on campus or online. This is a 12-24 month program. Upon completion of this fast-track program, students receive a high school diploma and are ready to enter the workforce full-time or to enter technical school. If the student chooses to attend college, he or she may do so by taking remedial classes for certain academic courses. Fees for this program may be paid in part or in full by student job earnings.

EASY AS
1 - 2 - 3

1 ▶ APPLY FOR ENROLLMENT

Complete application (forms A -I) and submit proper fees. FCA will request records from your child's previous school. Familiarize yourself with FCA's Policies and Procedures (pages 62-66).

2 ▶ SCHEDULE PLACEMENT TESTING

Students are placed in subject levels that are customized for their individual level of learning.

3 ▶ ATTEND FAMILY INTERVIEW

FCA partners with the parent in the learning process. FCA accepts students and families whom we believe will benefit from our learning environment.

PROGRAM HIGHLIGHTS

- For Students Age 16+
